Our Philosophy: Control the Test!

IES SAT Prep courses equip students with a specific technique that is unique to our SAT Prep philosophy: student accountability.

Simply, our programs help students identify patterns of error in order to improve precision and accuracy. These patterns of error are fixed via repeated, isolated practice.

Once precision and accuracy have been achieved, the student will then focus on speed through timed drills and practice sections.

Students will learn how to solve specific question-types with a certain technique and how to eliminate the wrong answers swiftly in order to maximize their ability to select the correct one.

**PRECISION

ACCURACY**

To optimize a student's chance of reaching his/her goal score, IES requires (and strongly recommends) a Verbal and Math Foundations course for those who earn a diagnostic score of 1050 or lower. The Foundations course focuses heavily on equipping the student with the core skills required to solve more complex concepts that they will encounter in a SAT Prep course and eventually on their official SAT. Students will continue their SAT prep with newfound confidence from the test-taking skills developed in this course and motivation from our teachers.

Reading	Writing	Math
Students will be taught efficient methods to analyze and understand passage text quickly and accurately. Passage annotation is heavily focused in this course in order to facilitate precision when answering questions.	Foundations grammar refines the student's knowledge of standard conventional English in prep for the SAT. By building a solid base in parts of speech, sentence structure, and punctuation, students will be able to tackle more difficult concepts that they will eventually encounter on the SAT.	Review of core algebraic and geometric strategies will be reinforced, in addition to the development of a solid foundation for the newly emphasized content areas geared toward college readiness, including Data Analysis and Statistics.
